

PT. Pandu Selamat Utama is pleased to announce that we are fully committed to supplying our customers with complete and reliable solutions to meet your Hydrogen Sulfide (H₂S) and Industrial safety requirements wherever your operation is located. Since 1996 our safety equipment and personnel have provided major drilling, production, and industrial clients with trustworthy performance under the most demanding conditions imaginable.

Today's technology allows us to drill deeper in remote areas around the world for oil, gas, and geothermal energy. Unfortunately advanced technology and secondary recovery methods also increase the risk of encountering unsafe working environments, in particular H₂S gas. Pandu has been providing our clients with durable, reliable, and cost effective equipment and service solutions to support your operation safely and minimize the related risks.

Pandu continues to emphasize the quality and availability of our service department whether onshore or offshore in a rental contract or in house after sales service of purchased equipment. Our service personnel are continually upgrading their skills by attending company sponsored training courses provided by the equipment manufacturers we represent.

Our safety training center is located in our office premises in Lebak Bulus South Jakarta. Our equipment storage, workshop and repair facility is located in Sawangan Bogor.

We have a team of experienced associates working together to supply total solutions to meet your safety needs. Choosing Pandu means you get consistent service quality and the best equipment available in the marketplace today for protection in an H₂S environment or for other safety related uses in the Industrial workplace. We stand by what we sell and supply the best service in the industry today.

Our goal is to ensure that you, our loyal customers, will have long term satisfaction and peace of mind. Please let us show you how we do that by considering Pandu as the source for all your safety requirements. All of us at Pandu appreciate your past business and look forward to the opportunity to be of service to you in the future.

Please call us today and we will provide you with the best safety solutions you can depend on now and in the future.

Sincerely yours,
Pete DeVries
