

The Avon-ISI compressed airline respirator range consists of the ARAP-C and the ARAP-Escape. Both ARAP units include a face piece, second-stage regulator and either a nylon or Kevlar harness assembly.

The ARAP line is available with a choice of face pieces: the Air Hood, the AirSwitch® facemask, or a standard facemask.

The ARAP-E is equipped with a 5, 10 or 15 minute escape cylinder for maximum escape safety margin. Both are available with either a nylon or Kevlar® harness.
